

ARIZONA'S WORKFORCE

A press release from the Arizona Dept. Of Economic Security, Research Administration

January 18, 2007

Arizona Economy Strong in December — 16,400 Jobs Gained, Jobless Rate at 4.1%

Arizona's economy grew by 16,400 nonfarm jobs in December, as total nonfarm employment reached a new record -- 2,719,400. Since December 2005, 116,000 jobs have been created for an over-the-year increase of 4.5 percent. Goods-producing industries gained 1,900 jobs in December, due in part to an expansion in manufacturing jobs and continued growth in construction. Service-providing industries gained 14,500 jobs.

Almost all major industry groups reported increases in employment levels. Six supersectors reached records: construction; trade, transportation and utilities; professional and business services; educational and health services; leisure and hospitality; and other services.

Arizona's seasonally adjusted unemployment rate was unchanged at 4.1 percent in December. At the national level, the jobless rate was also unchanged at 4.5 percent.

Trade, transportation and utilities stood out in December, adding 7,000 jobs — accounting for nearly 43 percent of the total monthly increase of nonfarm jobs. This major industry group once again reached a record high — 533,400 jobs. Notably, November job figures were revised downward by 1,200. Job growth in December was on par with the 10-year monthly percentage increase.

Retail trade added 4,900 jobs in December, but was well below its monthly 10-year average gain. Gains occurred in nearly every reported sector within retail trade. Department stores gained 1,700 jobs, while other general merchandise added 800. Motor vehicle and parts dealers' employment was down by 100. Building materials and garden equipment dealers experienced a loss of 500 jobs, possibly as a result of home improvement projects

Year to Year Pct. Chg.	4.5%	4.4%	5.2%

being put on hold during the winter season or a decrease in consumer spending.

The professional and business services industry continued to expand, adding 4,000 jobs, pushing its employment level to a record 414,900. This industry was the second largest contributor to the total monthly increase. Professional, scientific and technical services accounted for half of the job gains in this supersector (+2,000), while administrative and support and waste increased by nearly the same number (+1,800). Employment services gained 1,400. Services to buildings and dwellings lost 100.

Leisure and hospitality increased its workforce by 1,700 in December. Accommodation and food services added 1,000, with most jobs coming from food services and drinking places (+1,200). Accommodation was down by 200 jobs. Leisure and hospitality experienced a robust 5.3 percent over-the-year increase in employment in December, a percentage increase not seen since 1994.

Construction continued its expansion by reaching 254,500 jobs at the end of the year. Though employment growth continued to slow, construction still added 1,400

(continued on page 2)

jobs in December. Five hundred jobs were added in buildings and 1,100 were gained in specialty trades. Heavy construction employers pared 200 jobs.

Private educational and health services grew by 200 jobs to reach a record high of 292,200. Gains and losses varied widely. Educational services posted a loss of 300 jobs, while health care and social assistance grew by 500. Ambulatory health care services pared 100 jobs. Hospitals grew by 400 and nursing and residential care facilities gained 300.

Financial activities rebounded in December, adding 1,600 jobs. Gains were spread among its component industries. Finance and insurance added 800 jobs, as did real estate and rental and leasing. The gain in credit intermediation and related activities (+500) nearly offset the loss of 600 in November.

Other services (which includes businesses that are not elsewhere classified in services-providing industries) reported an increase of 500 and ended 2006 with a total of 99,500 jobs.

Despite the on-going labor dispute in Pima County, the state gained 500 manufacturing jobs in December after posting a loss of 1,400 jobs in November. Durable goods manufacturing overall was flat, as was aerospace products and parts. Fabricated metal added 300 jobs, while computer and electronic parts lost 200. Nondurable goods reported an increase of 500 jobs.

Natural resources and mining employment showed no

change in December. Monthly employment growth has remained steady throughout the year.

Government as a whole had a less-than-expected decrease of 200 jobs. Losses are usually expected at this time of year due to reductions in educational staff related to the winter break. Losses occurred in state education (-200) and in local education (-100). Federal government, however, gained 400 jobs.

Information continued to struggle with a loss of 300 jobs in December. Losses occurred in non-reported sectors. Publishing and telecommunications each gained 200 jobs. A total of 2,000 jobs have been pared over the year in this industry.

In conclusion, Arizona's economy added 16,400 jobs and reached a record level in December -- 2,719,400. The monthly increase was in line with the 10-year average growth rate for December. When compared to December 2005, Arizona's economy expanded by 116,000 jobs, representing 12-month growth of 4.5 percent. Gains were reported in eight of 11 major industries last month, while records were posted in six. While retail trade added more than 17,000 jobs since December 2005, monthly growth this December was weaker than expected. The unemployment rate was at 4.1 percent, which continued to remain below the national rate (4.5 percent). Finally, while the pace of growth slowed in 2006, the economy continued expanding at a very respectable and healthy pace.

***Note:** The January 2007 employment report will be released March 8 to allow time for the annual benchmarking process to be completed. Usually, the employment report is released about two weeks after national data is published. However, every year DES, Research Administration, delays the January release to allow time to incorporate the benchmarking of the previous two years' nonfarm employment data, as well as the labor force figures (e.g., unemployment). See next page for exact time and location.*

Release Presented by: Don Wehbey, DES, Research Administration Senior Economist

Equal Opportunity Employer/Program

Under the Americans with Disabilities Act (ADA), the department must make a reasonable accommodation to allow a person with a disability to take part in a program, service, or activity. For example, this means that if necessary, the department must provide sign language interpreters for people who are deaf, a wheelchair-accessible location, or enlarged print materials. It also means that the department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. This document is available in alternative formats by contacting the Arizona Department of Economic Security, Research Administration, at (602) 542-3871.

Notes:

- a) Labor force, unemployment, total employment, and seasonally adjusted unemployment rate should not be used for economic-assistance programs. Data for economic-assistance programs are available by contacting DES, Research Administration
- b) Preliminary and subject to revision in the following month.
- c) Revised Nonfarm Employment. However, beginning with the release of February 2006 data, the LAUS (Local Area Unemployment Statistics) program will no longer revise monthly estimates. LAUS data consist of labor force, employment, unemployment, and unemployment rate (unadjusted and seasonally adjusted). For more information, see the LAUS section of Arizona Workforce Informer:
<http://www.workforce.az.gov/?PAGEID=67&SUBID=142#UESStats>
- d) Adjusted to Current Population Survey (CPS) to reflect place of residence
- e) Normal seasonal variations have been eliminated to reflect underlying trends
- f) By place of work; does not include agricultural workers, self-employed, unpaid family members, and domestic workers
- g) Detail may not add up exactly due to rounding
- NA Not Available
